
BEAUHOME

TEXTURAL HOME DÉCOR

Named after the Camche family dog, Beau Home is a lot like its namesake: loyal, welcoming, and easy to love. The brand offers a collection of textural home décor spanning pillows, throws, woven baskets, and ceramics. Neutral tones are adaptable for an array of seasons and living spaces, so, like Beau's friendship, they're built to last.

PHILOSOPHY

Beau Home's philosophy is to let the quality of materials lead fabrication. All products are handwoven in Spain from mainly natural components, creating an aesthetic that is contemporary yet organic. A trade-only distribution allows the brand to offer its luxurious wares at affordable price points for discerning design professionals.

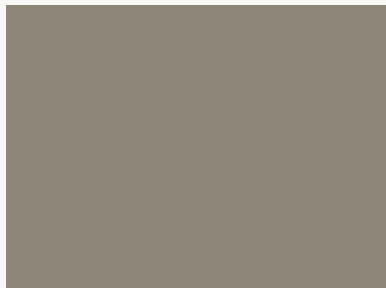

LAUREN KAPLAN *for* BEAU HOME

Beau Home founder Glenn Camche tapped Lauren Kaplan to create a line of her eponymous ceramics for Beau Home, featuring an understated design with an organic aesthetic, finished with the brand's signature leather accents.

Beau Home founder Glenn Camche has always been design-minded. Originally setting his sights on becoming an architect, he recalls, *"I have always had a passion for home development and design, and a particular interest in architectural details."* But when his mother founded Sondra Roberts handbags in 1980, Camche easily pivoted to help build the business.

As he combed through Europe's finest leathers and exotic skins, it was always in the back of his mind to enlist these unique textiles for home applications. Fast-forward to today, and Camche has done just that: Beau Home's unique combination of textiles and materials offer that finishing touch to elevate a room, just as a fine leather handbag completes an outfit.
